THE POWERFUL PETERS "HIGH VELOCITY" 22 —
CHECK THESE SPECIAL CONSTRUCTION FEATURES!

PETERS PACKS THE POWER!

PETERS

22 CALIBER CARTRIDGES for

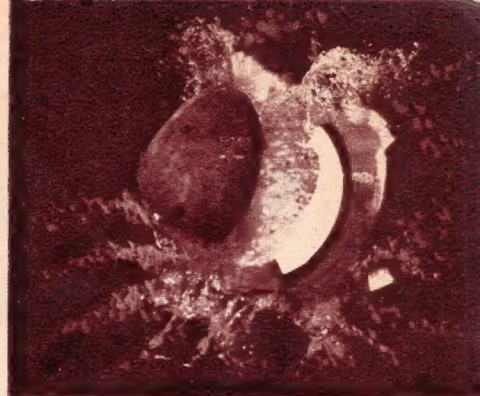

"HIGH VELOCITY"

Combining all the features wanted by the small bore shooter, "High Velocity" 22's are the answer to the shooter's prayer. They deliver the flat trajectory and smashing knockdown power at long range needed to put small game and pests down for keeps. Peters "High Velocity" 22's are loaded for maximum power, yet the special bullet lubrication and "Rustless" non-corrosive priming protect the barrel rifling at all times. Available with solid or hollow point bullets.

"TARGET" AND MATCH 22's

Peters "Target" 22's are standard velocity, popular priced cartridges featuring fine accuracy and Peters "Rustless" priming. Peters Match 22's are designed for perfect accuracy with a uniform center of impact over a long series of shots. You deserve the best—Peters Match 22's for competitive pistol or rifle shooting, and Peters "Target" 22's for small game and "plinking."

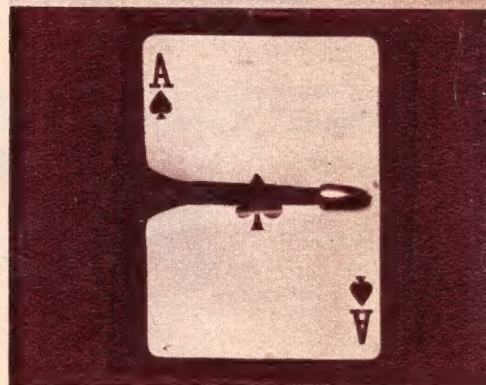

SMASHING IMPACT

Here's a "speedlight" photo of what happens to a tough shelled coconut when it's hit by a Peters "High Velocity" hollow point 22. Peters really packs the power!

ACE HIGH ACCURACY

With ammunition accurate enough to split a playing card, you'll find it easier to place your carefully aimed shots in the ten ring every time. Peters precision manufacturing methods combined with all new construction makes this possible with all Peters 22's!

FOR ACCURACY,
DEPENDABILITY, AND
REAL ENJOYMENT**

SHOOTING . . .

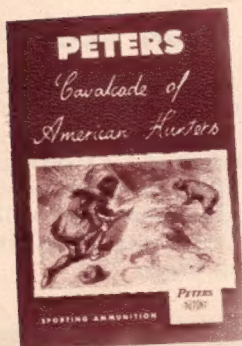

AMERICA'S GREAT OUTDOOR HERITAGE

Since pre-Revolutionary days Americans have been famous as expert hunters and marksmen, and became skilled in the use of firearms, not only because they helped provide protection and food, but because shooting is a truly great sport.

Shooting is not only a sport . . . it is self-reliance, endurance, stamina, skill, and character . . . it is a major contribution to the well being of America and her citizens.

By using sporting firearms skillfully and safely, you play an active part in preserving our country's tradition of superior marksmanship and skillful hunting.

The following booklets are available free to shooters. Just send a post-card to Advertising Department, Peters Cartridge Division, Bridgeport 2, Connecticut, for any of the following:

PETERS "CAVALCADE OF AMERICAN HUNTERS"
Daniel Boone, Abraham Lincoln, Buffalo Bill Cody . . . great names in American history, great names in the sport of hunting.

"SHOOTING ADVENTURES OF 'DOC' PETERS"
In comic book form for the young shooter. An interesting booklet of how shooting and hunting can make better citizens of today's youngsters.

Targets for practice and all kinds of shooting fun. These silhouette targets have been popular with shooters for teaching, learning, and just plain shooting fun.

Adapted to smooth bore single shot rifles.

2299 #12 Shot, Lead 68 lbs.

Packed 50 in a box. 10,000 in a case.

3 BIG REASONS WHY PETERS 22's ARE PREFERRED BY SMALL BORE SHOOTERS!

PENETRATION

Seven 7/8-inch pine boards—penetrated by a Peters "High Velocity" 22 solid-point bullet! That's real power!

SHOCK

Laundry soap is *blasted* by Peters "High Velocity" hollow point bullet. Terrific knock-down power for hunting pests.

ACCURACY

Bull's-eye accuracy at longer ranges is yours with Peters 22's. Makes it easier to stalk and get pests and small game.

PETERS

CENTER FIRE RIFLE CARTRIDGES

featuring "Inner-Belted" Bullets

"RUSTLESS"
NON-CORROSIVE
PRIMING provides
split-second
ignition.

PROGRESSIVE
BURNING
POWDER provides
proper velocity
and extreme
accuracy at safe
pressure limits.

TOP QUALITY
BRASS CASE with
micro close
tolerances.

PRIMER
sealed against
gun oil by Peters
"Oil-Tite" process.

"INNER BELTED"
BULLET with its
notched jacket
and thick mid-
section assures
uniform expansion.

Experienced hunters from Alaska to Africa count on the "smashing power" and rugged dependability of Peters "High Velocity" cartridges to bring down their game. The "Inner-Belted" construction of Peters rifle bullets provides terrific impact and deep penetration without disintegration. This improved bullet design in Soft Point, Hollow Point, and Pointed Soft Point bullet styles is available in 18 popular hunting calibers. Long range power, flat trajectory, pin-point accuracy, and all-weather dependability . . . four good reasons why shooters prefer powerful, Peters ammunition!

Peters center fire rifle cartridges with "Rustless" non-corrosive priming are also supplied in Metal Case, Protected Point Expanding, Lead and regular Soft Point bullet styles for selected calibers.

"INNER-BELTED" SOFT POINT

Special notching of gilding metal jacket provides uniform expansion upon impact. Expansion is about double the caliber at hunting ranges.

"INNER-BELTED" POINTED SOFT POINT

Has a sharp bullet profile, non-fouling metal jacket, lead core and directional nose cuts in jacket which permit fast, uniform expansion of bullet.

"INNER-BELTED" HOLLOW POINT

Deep penetration and controlled mushrooming is assured by special tip of bullet. There is a minimum of disintegration or loss in bullet weight.

NOTE: *High Velocity, Hi-Speed Cartridges must not be used in Revolvers, they should be used only in rifles made especially for them. Exceptions: items marked (†) are designed especially for the 38-44 Smith & Wesson Revolver and the 38 Colt Shooting Master. Pressure of these two cartridges is safe for lighter guns, but the recoil is likely to be more unpleasant and the frame may be shaken loose in time.

NOTE A: Not for use in revolvers chambered for 32 Smith & Wesson Long, or 32 Smith & Wesson.

NOTE B: All 38 Special cartridges can be used in 357 Magnum revolvers but not conversely.

PETERS BULLET TYPES

"WAD CUTTER"

For fine target shooting with pistols and revolvers. A natural for any shooter who wants pinpoint accuracy. Cuts clean hole in paper target.

LEAD

General purpose or "service load." A solid lead, round nose bullet, excellent for target or hunting.

METAL PENETRATING

A patented, special metal bullet designed especially for law enforcement agencies. Penetrates most metal, including steel.

LEAD GAS-CHECK

Special gas-check heel cap acts as piston ring. Seals gas behind bullet for pile-driver power.

METAL POINT

Gives better penetration than lead bullet due to non-fouling gilding metal jacket over nose.

PROTECTED POINT EXPANDING

Sharp solid metal point gives bullet superior wind bucking and trajectory characteristics. Excellent for all-around hunting use.

"INNER-BELTING" POINTED SOFT POINT

Unexcelled for flat trajectory, maximum remaining velocity, and maximum striking energy. Lead core, gilding metal jacket, directional nose cuts for uniform expansion.

"INNER-BELTING" HOLLOW POINT

Gives up to double caliber expansion due to exclusive "Inner-Belting" feature. A real big game getter. Lead core, gilding metal jacket.

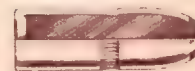

"INNER-BELTING" SOFT POINT

The most popular game bullet of all. A fine bullet style for hunting in brush country. Hard to deflect, delivers a terrific wallop. Gilding metal jacket with lead core exposed at tip for rapid expansion.

METAL CASE HOLLOW POINT

A fine big game bullet designed for deep penetration and maximum expansion. Lead core with gilding metal jacket.

SOFT POINT

A tried and true bullet style used by hunters for many years. Lead core is exposed through gilding metal jacket for twice caliber expansion.

METAL CASE

The perfect hunting bullet for game with extra tough hide, or for light game when minimum meat spoilage is desired. Full metal jacket over lead core.

TAPERED HEEL, POINTED

The most accurate bullet style made. Perfect accuracy over long ranges. Designed expressly for target shooting.

PETERS

CENTER FIRE

PISTOL AND REVOLVER

CARTRIDGES

BULLET OF SPECIAL DESIGN, close tolerance and weight. Properly lubricated to increase accuracy and prevent barrel fouling.

UNIFORM CRIMPING holds bullet and aids perfect combustion and improved accuracy. "Oil-Tite" at crimp and primer.

UNIFORM LOADING of newest smokless powder gives maximum effective performance.

Experience has shown that Peters pistol and revolver ammunition is unsurpassed in accuracy, fast ignition, smooth functioning and dependability.

Peters "Police Match" 38 Specials and 45 Automatic cartridges have achieved sensational victories in target shooting competition. All feature brass cases of solid head construction, "Rustless" priming, accurate bullet design.

Law enforcement agencies, too, rely on Peters pistol and revolver cartridges. These men know that Peters uniform loading, quick firing, superbly accurate and powerful cartridges are perfect for every emergency.

The powder and primer of every Peters center fire pistol and revolver cartridge is protected from any oil seepage by the exclusive "Oil-Tite" process.

PETERS

SHOTGUN SHELLS

Shown as
shotgun shell
example is
"Victor"
field load.

**PETERS
PACKS
THE
POWER . . .
and
PATTERNS**

PETERS

SHOTGUN SHELLS
ARE RIGHT FOR YOUR KIND OF SHOOTING!

Marshland or Upland...

you're always ahead with Peters "power rated" shells

Peters shotgun shells, with more knockdown power, will make a big difference in your shooting. For every type of game, every hunting range, Peters gives you the right load for hard hitting wallop.

"Power Rated" Performance—"Rustless" priming, wetproof body for extra strength, Peters crimp for perfect patterns . . . full dependability with Peters shotgun shells.

"HIGH VELOCITY"

Long-Range Power Load—Designed especially for greater power and reach. Forty-three different powder and shot combinations; gauges 10 to 410—plus six different loadings of Peters Buck Shot in 12, 16, and 20 gauges. And to convert your shotgun to a rifle of tremendous knockdown power, Peters Rifled Slugs are available in 12, 16, 20, 28, and 410 gauges.

"VICTOR"

Field Load—Fast, light-recoil loads for correct penetration and pattern density on a wide variety of upland game. Thirty-one different powder and shot combinations for everything from rail to rabbit—plus scatter loads for game-getting patterns in close cover. Available in 12, 16, and 20 gauges.

TARGET LOADS

When competition at the gun club gets hot and you want assurance in your target loads . . . Peters packs the patterns.

Here it is! An ALL-NEW Peters target load with 25% lighter wad column features the lightest recoil of any target-rated shell. That's not all. From new brass base to the special crimp, Peters Target Loads are all new. New primer, new base and column wads, new shell body. Each component has been improved and strengthened to give you perfect target-smashing patterns.

Shoot a case of these great new Peters shells. They have everything you've been looking for in a target load . . . and then some. You'll be in for real shooting surprise and pleasure.

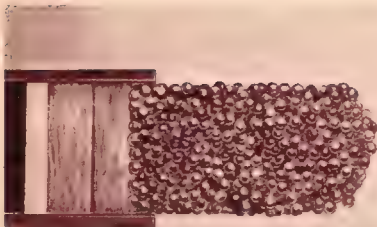

PETERS PACKS THE POWER

**Loaded With
Power For
Your Kind
of Hunting!**

You'll get "Rustless" priming that provides speedy ignition, will not cause rust or corrosion; Peters Flat-Top crimp that eliminates "blown patterns"; polished double-inspected uniform size shot. And each Peters shotgun shell is a precision product incorporating special features: Tough wax-coated bodies—Scuff-proof and "Water-Tite"; special wads to keep power behind shot, lubricated to reduce friction, prevent gas leakage; progressive burning powder for extra wallop.

Next time out, load up with Peters "High Velocity" or "Victor" shotgun shells . . . your best way to better shotgun shooting!

You get more pellets in the pattern as well as more power behind the pellets. Specially lubricated wads seal the gas piston-tight behind the shot charge. In front . . .

Flat-Top Crimp gives you full patterns every time. Because nothing obstructs the shot charge, you can count on dense, full patterns, with no holes through which game can escape. The result is . . .

More knockdown power as this dramatic illustration shows. For game like ducks, geese, fox, turkey, use Peters 2 3/4" magnum shells—loaded to the limit for power—for game-getting results!

AMERICA'S MOST POPULAR

TRAP & SKEET EQUIPMENT

NEW REMINGTON SQUARE SHOULDER "BLUE ROCK" TARGETS Ideal for Any Trap

NEW DESIGN! The new Remington square shoulder "Blue Rock" has weight where weight belongs! Dome of target is thin, rim is heavier, giving greater stability, more spin. More pronounced shot rings on dome catch shot — targets break easier when hit by only a few pellets. All adding up to higher scores!

NEW REMINGTON AUTOLOADING TRAP

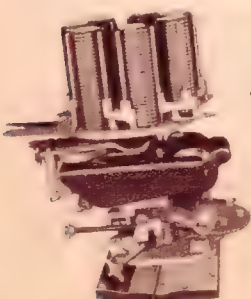

Labor-saving (no trap boy needed) • Large capacity (203 targets) • Easy loading, stack at a time • No tools required • Connects to 110 volt wiring system • Makes commercial gun clubs profitable!

MODEL 100T FOR TRAP

1 Remington autoloading trap with 1/2 HP motor, 60 cycle, 115 volts, and special auto-angling base. 1 push button release unit with 100 feet of wire. 1 power control box.

MODEL 200S FOR SKEET

2 Remington autoloading traps with 1/2 HP motors, 60 cycle, 115 volts. 1 walk around release unit and 70 feet of wire. 2 power control boxes. 1 connection box.

REMINGTON "EXPERT" TRAP

A strong, lightweight, sturdily built portable trap. Smooth operating. Just right for use at summer camps, cottages, aboard boats, or for trips into the country. Fine for "walk up" shooting games.

SUGGESTED SHOT SIZES FOR GAME

Game	Shell	Shot Size	Suggested Chokes	What Experienced Hunters Say . . .
DUCKS	Peters "High Velocity"	4, 5, 6	FULL—For Pass Shooting MODIFIED—Over Decoys	Use No. 4 shot for long range and pass shooting. For normal range—No. 5 or No. 6 shot while some hunters use No. 7½ shot for closer range shooting over decoys.
GEESE	Peters "High Velocity"	BB, 2, 4	FULL	Goose hunters need wallop to fold up their birds so they use the big loads with large shot. Many hunters prefer No. 4 shot for a denser pattern at shorter ranges over decoys.
PHEASANTS	Peters "High Velocity"	5, 6	MODIFIED FULL—For Long Cornfield Shots	For cornfield shooting where long shots are usual—better use No. 5. On a normal rise over dogs and for all around use No. 6 is the favorite.
GROUSE OR PARTRIDGE	Peters "High Velocity" or Peters "Victor"	5, 6 7½, 8	IMPROVED CYLINDER OR MODIFIED— For Brush Work FULL—For Open Ranges	On the smaller birds such as ruffed grouse or Hungarian Partridge use the smaller shot. The big western grouse (sage, sooty, and blue) call for heavier loads and large shot.
QUAIL	Peters "Victor"	7½, 8, 9	IMPROVED CYLINDER MODIFIED	For early season shooting on bob-whites when feathers are light some hunters use No. 9 shot. Later they switch to No. 7½ or No. 8. On the running and wild flushing type of quail, such as the Gambel's, larger shot is sometimes used.
DOVES AND PIGEONS	Peters "High Velocity" or Peters "Victor"	6, 7½, 8	MODIFIED	You can do a good job on mourning doves at normal ranges with the lighter loads and No. 7½ or No. 8 shot—but for longer ranges use the heavy loads and No. 6 or No. 7½. Use the same load on band-tailed pigeons and white wings.
WOODCOCK	Peters "Victor"	7½, 8, 9	IMPROVED CYLINDER MODIFIED	Your choice of shot size here will depend on ranges at which your game is shot. For fast shooting in the alder thickets, No. 8 shot is a good choice.
RABBITS	Peters "High Velocity" or Peters "Victor"	4, 5, 6	IMPROVED CYLINDER OR MODIFIED—For Brush FULL—For Long Open Shots	For cottontail rabbits at normal range, the lighter loads are suitable, but for larger game such as jack rabbits and snow shoe rabbits use heavy loads.
SQUIRRELS	Peters "High Velocity"	5, 6	MODIFIED	Most hunters use 5's or 6's and prefer the heavy loads particularly in the tall timber.
RAIL	Peters "Victor"	7½, 8, 9	IMPROVED CYLINDER	For little sora rail No. 8 or No. 9 does the job while many hunters use No. 7½ on the marsh hen or clapper rail.
TURKEY	Peters "High Velocity"	BB, 2, 4	FULL	Choice of shot size depends on your range. If you're a good caller No. 4 shot makes a clean kill while BB's and No. 2's are best for long shots.
FOX	Peters "High Velocity"	BB, 2	FULL	It's a toss-up between BB's and No. 2 shot. But remember—the smaller the shot, the denser the pattern.
DEER BLACK BEAR AND WOLF	Peters "High Velocity"	Rifled Slug and Buck Shot	For rifled slugs . . . any choke may be used. Full choke for buckshot loads.	For deer and black bear 12 and 16 gauge slugs are the best. 0 and 00 Buckshot are the most popular sizes for deer hunters who use buckshot.

Remington

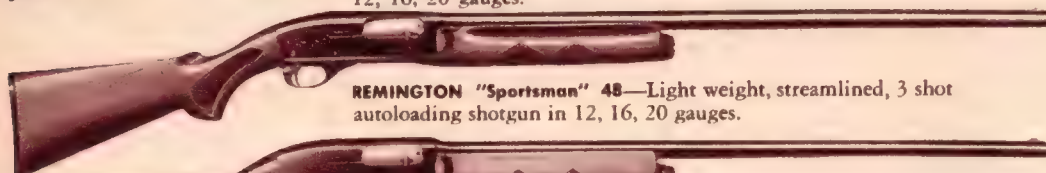

The Oldest Gunmakers in America Present the Newest Guns

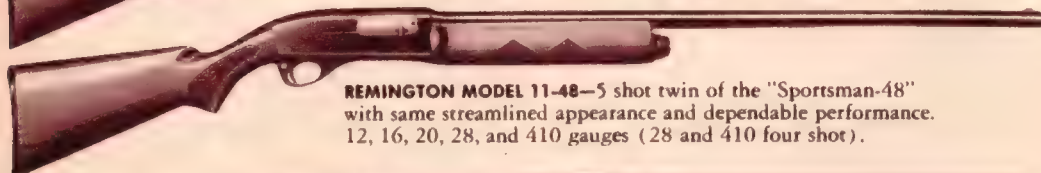

SHOTGUNS

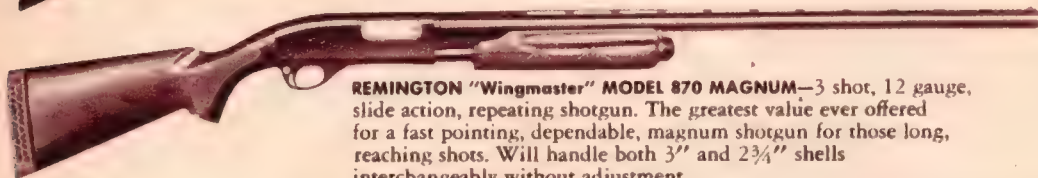

REMINGTON "Sportsman" 58—3 shot autoloading shotgun. Fastest loading, softest recoiling autoloading shotgun in the world. Light weight, instant pointing, ruggedness, and dependability are only a few features. Quick change barrels without adjustment. 12, 16, 20 gauges.

REMINGTON "Sportsman" 48—Light weight, streamlined, 3 shot autoloading shotgun in 12, 16, 20 gauges.

REMINGTON MODEL 11-48—5 shot twin of the "Sportsman-48" with same streamlined appearance and dependable performance. 12, 16, 20, 28, and 410 gauges (28 and 410 four shot).

REMINGTON "Wingmaster" MODEL 870 MAGNUM—3 shot, 12 gauge, slide action, repeating shotgun. The greatest value ever offered for a fast pointing, dependable, magnum shotgun for those long, reaching shots. Will handle both 3" and 2¾" shells interchangeably without adjustment.

REMINGTON "Wingmaster" MODEL 870—A pump shotgun of superior quality at moderate price. Light weight, perfect balance, quick pointing, double action bars for greater strength and stability make the Model 870 a winner in any class. 12, 16, 20 gauges.

NOW . . .

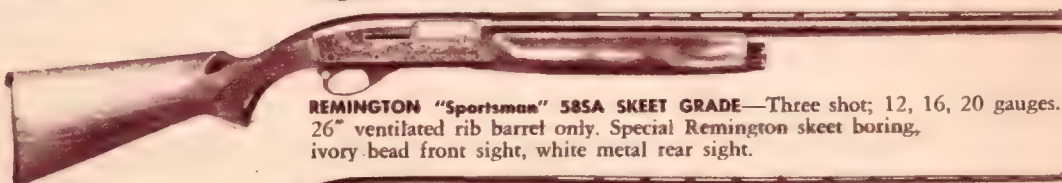

America's oldest gunmakers offer America's newest and most complete line of sporting firearms. Every gun is a masterpiece in its class. Fast, accurate, unconditionally dependable . . . and backed since 1816 by Remington's experience in the firearms field.

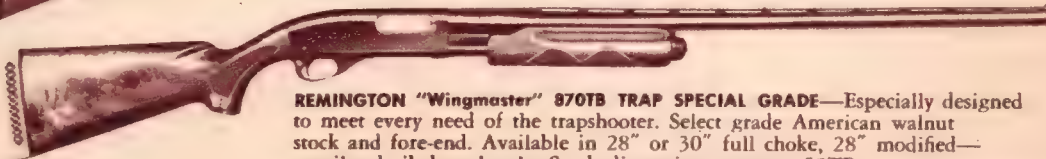

For TRAP and SKEET

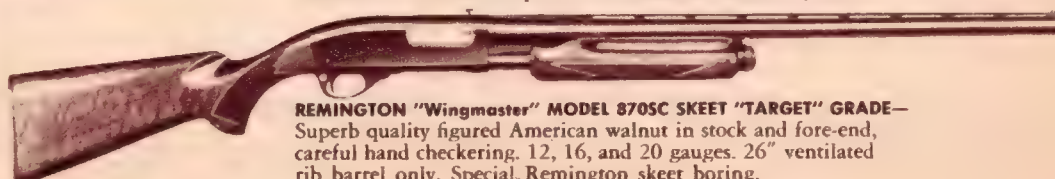

REMINGTON "Sportsman" 58TB TRAP SPECIAL GRADE—Available in 28" and 30" full choke ventilated rib barrel only. Select American walnut stock and fore-end. Ivory bead front sight. Remington recoil pad. Stock dimensions: length of stock 14¾", drop at heel 1⅞", at comb 1½". Weight 8 lbs.

REMINGTON "Sportsman" 58SA SKEET GRADE—Three shot; 12, 16, 20 gauges. 26" ventilated rib barrel only. Special Remington skeet boring, ivory bead front sight, white metal rear sight.

REMINGTON "Wingmaster" 870TB TRAP SPECIAL GRADE—Especially designed to meet every need of the trapshooter. Select grade American walnut stock and fore-end. Available in 28" or 30" full choke, 28" modified—ventilated rib barrel only. Stock dimensions same as 58TB.

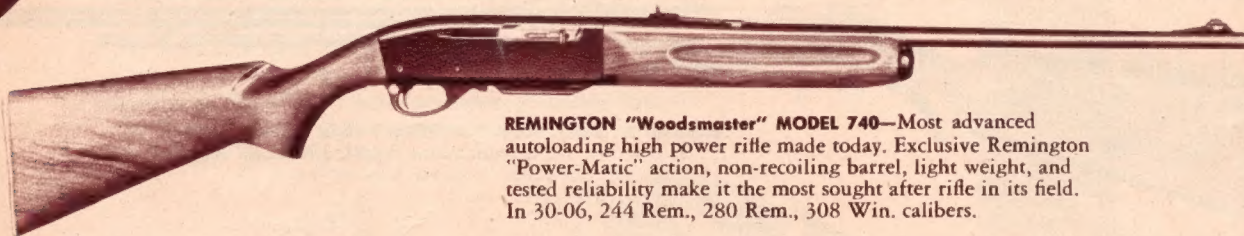

REMINGTON "Wingmaster" MODEL 870SC SKEET "TARGET" GRADE—Superb quality figured American walnut in stock and fore-end, careful hand checkering. 12, 16, and 20 gauges. 26" ventilated rib barrel only. Special Remington skeet boring.

Remington

CENTER FIRE RIFLES

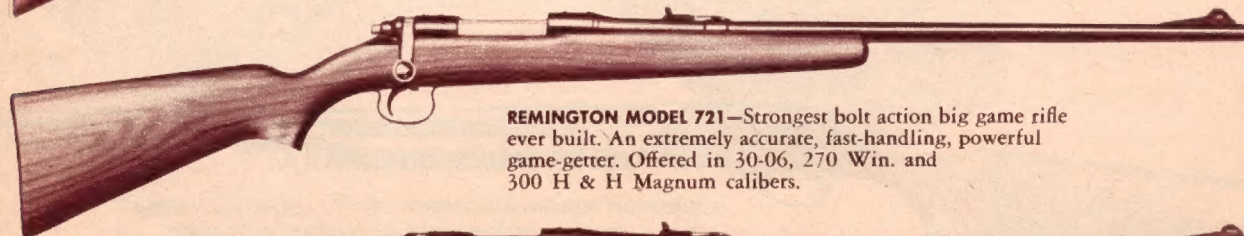

REMINGTON MODEL 725ADL—Chambered for 280 Remington, 270 Win. or 30-06 caliber, this new member of the sporting firearms field features a new all-purpose sporting stock, crisp match type trigger, and hinged floor plate. The Model 725 is a truly distinguished addition to the Remington family.

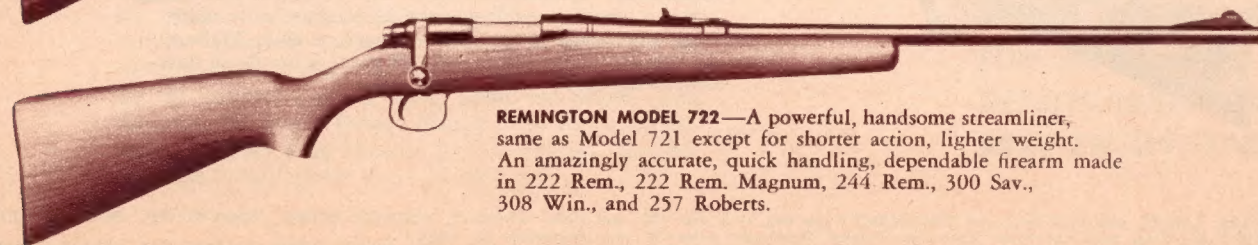

REMINGTON "Woodsmaster" MODEL 740—Most advanced autoloading high power rifle made today. Exclusive Remington "Power-Matic" action, non-recoiling barrel, light weight, and tested reliability make it the most sought after rifle in its field. In 30-06, 244 Rem., 280 Rem., 308 Win. calibers.

REMINGTON "Gamemaster" MODEL 760—The only slide action high power rifle made. The fastest hand operated big game rifle. New features exclusively found in Remington firearms. Offered in all grades in calibers 30-06, 222 Rem., 244 Rem., 270 Win., 280 Rem., 308 Win., 35 Rem.

REMINGTON MODEL 721—Strongest bolt action big game rifle ever built. An extremely accurate, fast-handling, powerful game-getter. Offered in 30-06, 270 Win. and 300 H & H Magnum calibers.

REMINGTON MODEL 722—A powerful, handsome streamliner, same as Model 721 except for shorter action, lighter weight. An amazingly accurate, quick handling, dependable firearm made in 222 Rem., 222 Rem. Magnum, 244 Rem., 300 Sav., 308 Win., and 257 Roberts.

Remington RIMFIRE RIFLES

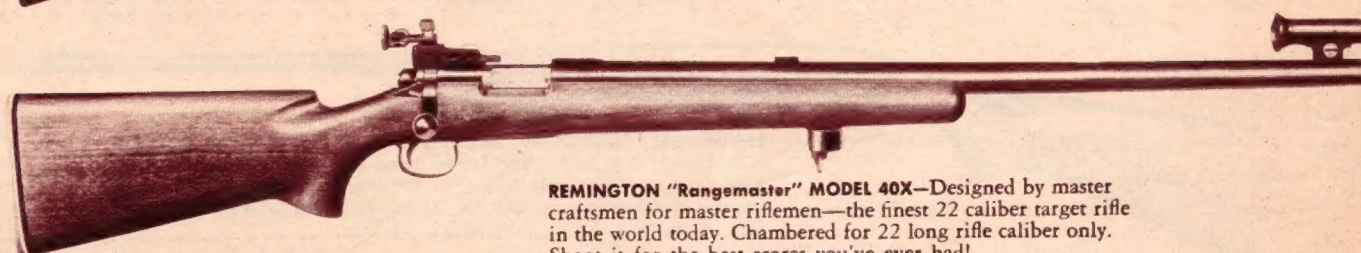

CHOICE OF SMALL-BORE ENTHUSIASTS

REMINGTON "Fieldmaster" LIGHTWEIGHT MODEL 572—The name Remington means "first in the firearms field since 1816" . . . and here's added proof. A great new lightweight 22 in *color*—Crow Wing Black and Buck Skin Tan—the new "Fieldmaster" weighs only 4 pounds! Custom chrome step adjustable sporting rear sight, gold finished front sight. "Sun Grain" stock is brand new idea . . . another first by America's oldest and finest gunmakers. This new slide action Remington 22 will surprise and delight the small bore shooter.
